DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-111, are drawn to a system and method for securely providing title data to a customer, classified in class 713, subclass 201.

II. Claims 112-129, are drawn to a method of watermarking data, classified in class 713, subclass 176.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility because it can be used for watermarking any type of data files, not necessarily the title data from a service bureau of invention I. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art

as shown by their different classification, restriction for examination purposes as indicated is proper.
